## AUTOMOTIVE MECHATRONICS

ASSESSMENT PACKAGE
National Vocational Certificate Level 4

Version 1 - November, 2019

| Title of Qualification: | CS Code: <br> 071400963 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Automotive Mechatronics |  |  |  |$\quad$ Assessment Date (DD/MM/YY):

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 1. Assessment Task 1: Select appropriate tools and equipment to perform service of wiper motors, wiper arms, washer lines and nozzles. <br> 2. Assessment Task 2: Select appropriate tools and equipment to repair Electronic Power steering System (EPS) with the help of OBD - II scanner. <br> 3. Assessment Task 3: Select appropriate tools and equipment to diagnose the faults of sensors by using OBD - II scanner. <br> And complete: <br> 4. Knowledge assessment test (Written or Oral) <br> 5. Portfolios at the time of assessment |
| aMinimum <br> Evidence <br> Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Remove and fit wiper motors and wiper arms <br> Performance Criteria 4: Remove and fit washer lines and washer nozzles <br> Performance Criteria 5: Remove and fit combination switch |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Preform diagnosing of faults in electronic power steering system (EPS) <br> Performance Criteria 4: Remove and fit electronic power steering rack Performance Criteria 5: Remove and fit Engine controlling unit (ECU) |
|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Remove and fit sensors <br> Performance Criteria 4: Perform function of sensors. |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio : Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activity |  | Method |  |  |  |  | Result |  |  |
| Nature of Activity |  |  | $\overline{0}$ |  |  |  |  |  |  |
| Practical Skill Demonstration |  |  |  | $\checkmark$ |  | $\checkmark$ |  |  |  |
| Knowledge Assessment |  | $\checkmark$ | $\checkmark$ |  |  |  |  |  |  |
| Other Requirement |  |  |  |  | $\checkmark$ |  |  |  |  |
| Each Assessment Task (with performance criteria) |  |  |  |  |  |  |  |  |  |
| Assessment Task 1 |  |  |  | Description of assessment task 1: Select appropriate tools and equipment to perform service of wiper motors, wiper arms, washer lines and nozzles. |  |  |  |  |  |
| During the practical assessment, candidate demonstrated the following: |  |  |  |  |  | Yes | No | Rem |  |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |  |  |  |  |
| 3 | Performance Criteria 3: Removed and fit wiper motors and wiper arms |  |  |  |  |  |  |  |  |
| 4 | Performance Criteria 4: Removed and fit washer lines and washer nozzles |  |  |  |  |  |  |  |  |
| 5 | Performance Criteria 5: Removed and fit combination switch |  |  |  |  |  |  |  |  |
| Competent $\square$ |  |  | Not Yet Competent $\square$ |  |  |  |  |  |  |

| Assessment Task 2 |  | Description of assessment task 2: Select appropriate tools and equipment to repair Electronic Power steering System (EPS) with the help of OBD - II scanner. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |
| 3 | Performance Criteria 3: Preformed diagnosing of faults in electronic power steering system (EPS) |  |  |  |  |
| 4 | Performance Criteria 4: Removed and fit electronic power steering rack |  |  |  |  |
| 5 | Performance Criteria 5: Removed and fit Engine controlling unit (ECU) |  |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |

| Assessment Task 3 |  | Description of assessment task 3: Select appropriate tools and equipment to diagnose the faults of sensors by using OBD - II scanner. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance safety requir | nt health and of task |  |  |  |
| 2 | Performanc equipment |  |  |  |  |
| 3 | Performance | fit sensors |  |  |  |
| 4 | Performanc sensors. | ction of |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Perpetuate Controlled Electrical \& Electronics <br> System-II | Assessment Date (DD/MM/YY): |  |  |

| Guidance <br> for <br> Candidate | To complete your assessment for this Competency Standard, you need to <br> answer the questions on the following pages successfully. |
| :--- | :--- |

Assessors Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Candidate Details | Name: $\qquad$ Registration/Roll Number: <br> Candidate Signature: $\qquad$ $\qquad$ |
| :---: | :---: |
| Written Assessment Outcome | Name of the Assessor: $\qquad$ Assessor's code: <br> Signature of the Assessor: $\qquad$ |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Perpetuate Controlled Electrical \& Electronics System-II | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :---: |
| 1. What is the function of wiper in a vehicle? |  |
| 2. What is windscreen washer system? |  |
| 3. Define rain sensor? |  |
| 4. Explain combination switch? |  |
| 5. Explain electric power steering (EPS)? |  |
| 6. What is the function of oxygen sensor? |  |
| 7. What is the position of crank position sensors? |  |
| 8. Explain the function of cam sensor? |  |

| Question | Candidate's answer |
| :---: | :--- |
| $9 .$What is function of throttle <br> position sensors? |  |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400961 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Conserve Power Transmission-II | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance <br> for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 6. Assessment Task 1: Select appropriate tools and equipment to perform and diagnosis of continuous variable transmission (CVT) with the help of OBD - II scanner. <br> 7. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of continuous variable transmission (CVT). <br> 8. Assessment Task 3: Perform continuous variable transmission (CVT) test by lift up/ road test drive as per instruction. <br> And complete: <br> 9. Knowledge assessment test (Written or Oral) <br> 10. Portfolios at the time of assessment |
|  | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify faults of continuous variable transmission <br> (CVT) with the help of OBD - II scanner <br> Performance Criteria 4: Check function of sensors <br> Performance Criteria 5: Perform replacement of faulty sensors |
| Minimum Evidence Required | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Preform inspection of all continuous variable transmission (CVT) sensors with the help of OBD - II scanner <br> Performance Criteria 4: Check and replacement of continuous variable transmission (CVT) oil <br> Performance Criteria 5: Perform belt replacement of continuous variable transmission (CVT) <br> Performance Criteria 6: Perform and replacement of continuous variable transmission (CVT) oil seal <br> Performance Criteria 7: Check and inspection of primary, secondary \& manual valve body performance <br> Performance Criteria 8: Perform replacement of shaft bearings |

## Assessment Task 3

Performance Criteria 1: Apply relevant health and safety requirements during completion of task
Performance Criteria 2: Select tools and equipment for the given task
Performance Criteria 3: Preform lift up/ road test of continuous variable transmission (CVT)

Portfolios required at the time of assessment (if any) for
Performance criteria 1 for the evaluation of portfolio : Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Candidate Details | Name: Registration/Roll Number: <br> Candidate Signature: |

| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Conserve Power Transmission-II | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :---: |
| 1. A continuous variable transmission (CVT) also known as $\qquad$ | 1. Shiftless transmission <br> 2. Shift gear transmission |
| 2. The belt use in continuous variable transmission (CVT) is made up of $\qquad$ | 1. Rubber belt <br> 2. Steel belt <br> 3. Leather belt <br> 4. None of these |
| 3. What component in continuous variable transmission (CVT) is used to switch the rotation direction? | 1. Dry pulley <br> 2. Driven pulley <br> 3. Planetary gear assembly <br> 4. Secondary driven gear |
| 4. Start clutch is located in a place which allow the pulleys and the steel belt to be isolated from the wheels when the start clutch is not engaged? | True/False |
| 5. The ATF pump in continuous variable transmission (CVT) is driven by $\qquad$ | 1. Input shaft <br> 2. Output shaft <br> 3. None of these |
| 6. The forward clutch engaged and disengaged the $\qquad$ | 1. Ring gear <br> 2. Sun gear <br> 3. Pinion gear <br> 4. None of these |
| 7. Continuous variable transmission (CVT) contains how many parallel shafts? | $\begin{array}{ll}\text { 1. } & 1 \\ \text { 2. } & 2 \\ \text { 3. } & 3 \\ \text { 4. } & 4\end{array}$ |
| 8. Which direction does the steel belt turn when driving in forward and reverse? | In reverse the steel belt turns in the opposite direction as in forward. |

| Question | Candidate's answer |
| :---: | :--- |
| 9. Explain continuous variable <br> transmission (CVT)? | Continuous variable transmission is an automatic transmission that can <br> change seamlessly through a continuous range of effective gear ratios. |
| 10. Write down the components <br> name of continuous variable <br> transmission (CVT)? | The components of continuous variable transmission (CVT) are as follows: <br> Steel belt, planetary gear assembly, forward clutch, reverse brake, start <br> clutch, fly wheel, parking mechanism, ATF pump, hydraulic valve unit and <br> Power control unit (PCU). |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400960 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Emission Control System | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 11. Assessment Task 1: Select appropriate tools and equipment to perform operation and diagnose faults of exhaust gases. <br> 12. Assessment Task 2: Select appropriate tools and equipment to perform operation and diagnose faults of Exhaust gas recirculation (EGR) system. <br> 13. Assessment Task 3: Select appropriate tools and equipment to operate and demonstrate re generation process of diesel EFI system by using OBD - II scanner. <br> And complete: <br> 14. Knowledge assessment test (Written or Oral) <br> 15. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify faults of catalytic converter for chocked and damages <br> Performance Criteria 4: Identify and diagnose faults of charcoal canister \& purge valve <br> Performance Criteria 5: Identify and diagnose faults of positive crankcase \& ventilation (PCV) valve <br> Performance Criteria 6: Perform inspection of fuel tank and lid gasket sealing <br> Performance Criteria 7: Perform inspection of exhaust gas recirculation (EGR) valve with the help of vacuum gauge <br> Performance Criteria 8: Perform inspection and fault diagnose of oxygen sensors with the help of OBD - II scanner |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Preform inspection of exhaust gas recirculation (EGR) valve with the help of OBD - II scanner <br> Performance Criteria 4: Perform service of exhaust gas recirculation (EGR) valve |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activity |  | Method |  |  |  |  | Result |  |  |
| Nature of Activity |  |  | $\overline{0}$ |  |  |  |  |  |  |
| Practical Skill Demonstration |  |  |  | $\checkmark$ |  | $\checkmark$ |  |  |  |
| Knowledge Assessment |  | $\checkmark$ | $\checkmark$ |  |  |  |  |  |  |
| Other Requirement |  |  |  |  | $\checkmark$ |  |  |  |  |
| Each Assessment Task (with performance criteria) |  |  |  |  |  |  |  |  |  |
| Assessment Task 1 |  |  |  | Description of assessment task 1 <br> Select appropriate tools and equipment to perform operation and diagnose faults of exhaust gases. |  |  |  |  |  |
| During the practical assessment, candidate demonstrated the following: |  |  |  |  |  | Yes | No | Rem |  |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |  |  |  |  |
| 3 | Performance Criteria 3: Identified faults of catalytic converter for chocked and damages |  |  |  |  |  |  |  |  |
| 4 | Performance Criteria 4: Identified and diagnose faults of charcoal canister \& purge valve |  |  |  |  |  |  |  |  |
| 5 | Performance Criteria 5: Identified and diagnose faults of positive crankcase \& ventilation (PCV) valve |  |  |  |  |  |  |  |  |
| 6 | Performance Criteria 6: Performed inspection of fuel tank and lid gasket sealing |  |  |  |  |  |  |  |  |
| 7 | Performance Criteria 7: Performed inspection of exhaust gas recirculation (EGR) valve with the help of vacuum gauge |  |  |  |  |  |  |  |  |
| 8 | Performance Criteria 8: Performed inspection and fault diagnose of oxygen sensors with the help of OBD - Il scanner |  |  |  |  |  |  |  |  |
| Competent $\square$ |  |  | Not Yet Competent $\square$ |  |  |  |  |  |  |

|  | ment Task 2 | Description <br> Select approp operation and recirculation | asse iate to diagno GR) |  | task 2 <br> quipment to perform of Exhaust gas |
| :---: | :---: | :---: | :---: | :---: | :---: |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :---: |
| 1. What is emission control system? |  |
| 2. What are the main components of emission control system? |  |
| 3. What is the function of catalytic converter? |  |
| 4. What is the function of Exhaust gases recirculation (EGR) valve? |  |
| 5. What is AD Blue? |  |
| 6. What is diesel particulate filter (DPF)? |  |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400959 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Fuel Control System-II | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 16. Assessment Task 1: Select appropriate tools and equipment to perform maintenance of gasoline direct injection (GDI). <br> 17. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of common rail direct injection (CRDI). <br> 18. Assessment Task 3: Select appropriate tools and equipment to perform maintenance of eco-idle system. <br> And complete: <br> 19. Knowledge assessment test (Written or Oral) <br> 20. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check the engine parameters with the help of OBD Il scanner <br> Performance Criteria 4: Perform test low and high pressure pump control circuit |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check low pump pressure test by using pressure gauge <br> Performance Criteria 4: Check high pump pressure test by using pressure gauge <br> Performance Criteria 5: Check pressure control valve |

|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check all parameters (Battery, Temperature, starter motor, coolant, etc.) <br> Performance Criteria 4: Check function of eco-idle system |
| :---: | :---: |

| Competency Standard Title: <br> Maintain Fuel Control System - II | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :--- |
| 7. What is gasoline direct <br> injection (GDI)? | The Gasoline is highly pressurized, and injected directly into the <br> combustion chamber of each cylinder via common rail fuel line as oppose <br> to conventional multipoint fuel injection that injects fuel into the intake <br> cylinder port. |
| 8. What is CRDI stands for? | CRDI stands for common rail direct injection. |
| 9.How common rail direct <br> injection (CRDI) works? <br> 10. What is the difference <br> between CRDI and TDI <br> engine? <br> CRDI directly inject fuel into the cylinders of a diesel engine through a <br> single common line known as the common rail. <br> 11. What is echo-idle system? <br> injection engine. | An echo-idle system is starts stop system in automobiles. |
| 12. What is the working of |  |
| pressure control valve? | Pressure control valve is a relieve valve or safety valve used to control or <br> limit the pressure in the system. |

| Title of Qualification: | CS Code: <br> 071400964 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Automotive Mechatronics |  |  |  |$\quad$ Assessment Date (DD/MM/YY):

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 21. Assessment Task 1: Select appropriate tools and equipment to check the operation of navigation system. <br> 22. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of control area network (CAN) system. <br> 23. Assessment Task 3: Select appropriate tools and equipment to demonstrate the electric parking system. <br> And complete: <br> 24. Knowledge assessment test (Written or Oral) <br> 25. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location of navigation device \& antenna <br> Performance Criteria 4: Perform removal and fitting of LCD from dashboard. <br> Performance Criteria 5: Check function of navigation card |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location of control area network (CAN) connector. <br> Performance Criteria 4: Remove and refit of control area network (CAN) connector. |

|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location and function of ABS modulator <br> Performance Criteria 4: Identify the location and function of electric parking brake motors <br> Performance Criteria 5: Perform function of OBD - II scanner to release the electric parking brake motors |
| :---: | :---: |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio: Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Competency Standard Title: <br> Maintain Network System | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :---: |
| 11. Define navigation system? | Navigation system is a system that aids in navigation. |
| 12. Types of navigation system? | 5. Automotive navigation system <br> 6. Marine navigation system <br> 7. Satellite navigation system <br> 8. Surgical navigation system <br> 9. Inertial guidance system <br> 10. Robotic mapping |
| 13. What is the best navigation system? | Global positioning system (GPS) is the best navigation system. |
| 14. Explain control area network (CAN)? | Control area network (CAN) is a robust vehicle bus standard design to allow microcontroller and devices to communicate with each other in application without a host computer. |
| 15. Explain the application of control area network (CAN)? | 1. Passenger vehicles <br> 2. Trucks <br> 3. Buses <br> 4. Gasoline vehicle <br> 5. Electrical vehicles <br> 6. Elevators <br> 7. Escalators <br> 8. Medical instruments \& equipments |
| 16. What is hill assist system? | Hill assist system control the car when you have stopped on an incline and want to start moving again. |
| 17. What is ABS modulator? | ABS modulator is a device which electronically control ABS brakes from brake locking up status. |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400962 | Level: 4 | Version: |

| Candidate <br> Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 35. Assessment Task 1: Select appropriate tools and equipment to perform and diagnosis of continuous variable transmission (CVT) with the help of OBD - Il scanner. <br> 36. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of continuous variable transmission (CVT). <br> 37. Assessment Task 3: Perform continuous variable transmission (CVT) test by lift up/ road test drive as per instruction. <br> And complete: <br> 38. Knowledge assessment test (Written or Oral) <br> 39. Portfolios at the time of assessment |
|  | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify faults of continuous variable transmission <br> (CVT) with the help of OBD - II scanner <br> Performance Criteria 4: Check function of sensors <br> Performance Criteria 5: Perform replacement of faulty sensors |
| Minimum Evidence Required | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Preform inspection of all continuous variable transmission (CVT) sensors with the help of OBD - II scanner <br> Performance Criteria 4: Check and replacement of continuous variable transmission (CVT) oil <br> Performance Criteria 5: Perform belt replacement of continuous variable transmission (CVT) <br> Performance Criteria 6: Perform and replacement of continuous variable transmission (CVT) oil seal <br> Performance Criteria 7: Check and inspection of primary, secondary \& manual valve body performance <br> Performance Criteria 8: Perform replacement of shaft bearings |

|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during <br> completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Preform lift up/ road test of continuous variable <br> transmission (CVT) |
| :---: | :---: |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio: Submit note book or <br> practical activity journal, completed during this specific module, for relevant <br> activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Candidate Details | Name: $\qquad$ Registration/Roll Number: <br> Candidate Signature: $\qquad$ $\square$ |
| :---: | :---: |
| Assessment Outcome | Name of the Assessor: $\qquad$ Assessor's code: $\qquad$ <br> Signature of the <br> Assessor: $\qquad$ |

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activity | Method |  |  |  |  | Result |  |
| Nature of Activity | $\frac{\stackrel{c}{\overline{0}}}{\stackrel{y}{7}}$ | $\overline{0}$ |  | $\begin{aligned} & \text { 으 } \\ & \text { 은 } \\ & \text { L } \end{aligned}$ |  | $\begin{aligned} & \stackrel{\rightharpoonup}{\overline{0}} \\ & \stackrel{\rightharpoonup}{0} \\ & \stackrel{0}{\overline{0}} \\ & 0 \\ & \hline \end{aligned}$ |  |
| Practical Skill Demonstration |  |  | $\checkmark$ |  | $\checkmark$ |  |  |
| Knowledge Assessment | $\checkmark$ | $\checkmark$ |  |  |  |  |  |
| Other Requirement |  |  |  | $\checkmark$ |  |  |  |

| Each Assessment Task (with performance criteria) |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Assessment Task 1 |  | Description of assessment task 1 <br> Select appropriate tools and equipment to perform and <br> diagnosis of continuous variable transmission (CVT) <br> with the help of OBD - II scanner. |  |  |
| 1 | Performance Criteria 1: Applied relevant health and <br> safety requirements during completion of task |  |  |  |
| 2 | During the practical assessment, candidate demonstrated the <br> following: <br> equipment for the given task | Yes | No | Remarks |
| 3 | Performance Criteria 3: Identified faults of continuous <br> variable transmission (CVT) with the help of OBD - II <br> scanner |  |  |  |
| 4 | Performance Criteria 4: Checked function of sensors |  |  |  |
| 5 | Performance Criteria 5: Performed replacement of <br> faulty sensors |  |  |  |
| Competent $\square$ | Not Yet Competent $\square$ |  |  |  |

| Assessment Task 2 |  |  | Description of assessment task 2 <br> Select appropriate tools and equipment to perform <br> maintenance of continuous variable transmission (CVT). |  |
| :--- | :--- | :--- | :--- | :--- |
| 1 | During the practical assessment, candidate demonstrated the <br> following: | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and <br> safety requirements during completion of task |  |  |  |
| 2 | Performance Criteria 2: Selected tools and <br> equipment for the given task |  |  |  |
| 3 | Performance Criteria 3: Preformed inspection of all <br> continuous variable transmission (CVT) sensors with <br> the help of OBD - II scanner |  |  |  |
| 4 | Performance Criteria 4: Checked and replacement of <br> continuous variable transmission (CVT) oil |  |  |  |
| 5 | Performance Criteria 5: Performed belt replacement <br> of continuous variable transmission (CVT) |  |  |  |
| 6 | Performance Criteria 6: Performed and replacement <br> of continuous variable transmission (CVT) oil seal |  |  |  |
| 7 | Performance Criteria 7: Checked and inspection of <br> primary, secondary \& manual valve body <br> performance |  |  |  |
| 8 | Performance Criteria 8: Performed replacement of <br> shaft bearings |  |  |  |
| Competent $\square$ | Not Yet Competent |  |  |  |

| Assessment Task 3 |  | Description of assessment task 3 <br> Perform continuous variable transmission (CVT) test by lift up/ road test drive as per instruction. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |
| 3 | Performance Criteria 3: Preformed lift up/ road test of continuous variable transmission (CVT) |  |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Conserve Power Transmission-II | Assessment Date (DD/MM/YY): |  |  |

| Guidance <br> for <br> Candidate | To complete your assessment for this Competency Standard, you need to <br> answer the questions on the following pages successfully. |
| :--- | :--- |

Assessors Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Candidate Details | Name: $\qquad$ Registration/Roll Number: <br> Candidate Signature: $\qquad$ $\qquad$ |
| :---: | :---: |
| Written Assessment Outcome | Name of the Assessor: $\qquad$ Assessor's code: <br> Signature of the Assessor: $\qquad$ |

| Competency Standard Title: <br> Conserve Power Transmission-II | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :---: |
| 25. A continuous variable transmission (CVT) also known as $\qquad$ | 3. Shiftless transmission <br> 4. Shift gear transmission |
| 26. The belt use in continuous variable transmission (CVT) is made up of $\qquad$ | 11. Rubber belt <br> 12. Steel belt <br> 13. Leather belt <br> 14. None of these |
| 27. What component in continuous variable transmission (CVT) is used to switch the rotation direction? | 5. Dry pulley <br> 6. Driven pulley <br> 7. Planetary gear assembly <br> 8. Secondary driven gear |
| 28. Start clutch is located in a place which allow the pulleys and the steel belt to be isolated from the wheels when the start clutch is not engaged? | True/False |
| 29. The ATF pump in continuous variable transmission (CVT) is driven by $\qquad$ | 4. Input shaft <br> 5. Output shaft <br> 6. None of these |
| 30. The forward clutch engaged and disengaged the $\qquad$ | 5. Ring gear <br> 6. Sun gear <br> 7. Pinion gear <br> 8. None of these |
| 31. Continuous variable transmission (CVT) contains how many parallel shafts? | 5. 1 <br> 6. 2 <br> 7. 3 <br> 8. 4 |
| 32. Which direction does the steel belt turn when driving in forward and reverse? | In reverse the steel belt turns in the opposite direction as in forward. |

| Question | Candidate's answer |
| :---: | :--- |
| 33. Explain continuous variable <br> transmission (CVT)? | Continuous variable transmission is an automatic transmission that can <br> change seamlessly through a continuous range of effective gear ratios. |
| 34. Write down the components <br> name of continuous variable <br> transmission (CVT)? | The components of continuous variable transmission (CVT) are as follows: <br> Steel belt, planetary gear assembly, forward clutch, reverse brake, start <br> clutch, fly wheel, parking mechanism, ATF pump, hydraulic valve unit and <br> Power control unit (PCU). |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400960 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Emission Control System | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 40. Assessment Task 1: Select appropriate tools and equipment to perform operation and diagnose faults of exhaust gases. <br> 41. Assessment Task 2: Select appropriate tools and equipment to perform operation and diagnose faults of Exhaust gas recirculation (EGR) system. <br> 42. Assessment Task 3: Select appropriate tools and equipment to operate and demonstrate re generation process of diesel EFI system by using OBD - II scanner. <br> And complete: <br> 43. Knowledge assessment test (Written or Oral) <br> 44. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify faults of catalytic converter for chocked and damages <br> Performance Criteria 4: Identify and diagnose faults of charcoal canister \& purge valve <br> Performance Criteria 5: Identify and diagnose faults of positive crankcase \& ventilation (PCV) valve <br> Performance Criteria 6: Perform inspection of fuel tank and lid gasket sealing <br> Performance Criteria 7: Perform inspection of exhaust gas recirculation (EGR) valve with the help of vacuum gauge <br> Performance Criteria 8: Perform inspection and fault diagnose of oxygen sensors with the help of OBD - II scanner |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task Performance Criteria 3: Preform inspection of exhaust gas recirculation (EGR) valve with the help of OBD - Il scanner <br> Performance Criteria 4: Perform service of exhaust gas recirculation (EGR) valve |

## Assessment Task 3

Performance Criteria 1: Apply relevant health and safety requirements during completion of task
Performance Criteria 2: Select tools and equipment for the given task
Performance Criteria 3: Preform inspection of regeneration process in diesel
EFI system with the help of OBD - II scanner
Performance Criteria 4: Preform service of regeneration process in diesel
EFI system
Portfolios required at the time of assessment (if any) for
Performance criteria 1 for the evaluation of portfolio : Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activity |  | Method |  |  |  |  | Result |  |  |
| Nature of Activity |  |  | $\overline{0}$ |  |  |  |  |  |  |
| Practical Skill Demonstration |  |  |  | $\checkmark$ |  | $\checkmark$ |  |  |  |
| Knowledge Assessment |  | $\checkmark$ | $\checkmark$ |  |  |  |  |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :--- |
| 13. What is emission control <br> system? |  |
| 14. What are the main <br> components of emission <br> control system? |  |
| 15. What is the function of <br> catalytic converter? |  |
| 16. What is the function of |  |
| Exhaust gases recirculation |  |
| (EGR) valve? |  |$\quad$| 17. What is AD Blue? |
| :---: |
| 18. What is diesel particulate |
| filter (DPF)? |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400959 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Fuel Control System-II | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\square$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 45. Assessment Task 1: Select appropriate tools and equipment to perform maintenance of gasoline direct injection (GDI). <br> 46. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of common rail direct injection (CRDI). <br> 47. Assessment Task 3: Select appropriate tools and equipment to perform maintenance of eco-idle system. <br> And complete: <br> 48. Knowledge assessment test (Written or Oral) <br> 49. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check the engine parameters with the help of OBD Il scanner <br> Performance Criteria 4: Perform test low and high pressure pump control circuit |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check low pump pressure test by using pressure gauge <br> Performance Criteria 4: Check high pump pressure test by using pressure gauge <br> Performance Criteria 5: Check pressure control valve |

|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Check all parameters (Battery, Temperature, starter motor, coolant, etc.) <br> Performance Criteria 4: Check function of eco-idle system |
| :---: | :---: |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio : Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |  |  |

| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Fuel Control System - II | Assessment Date (DD/MM/YY): |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :--- |
| 19. What is gasoline direct <br> injection (GDI)? | The Gasoline is highly pressurized, and injected directly into the <br> combustion chamber of each cylinder via common rail fuel line as oppose <br> to conventional multipoint fuel injection that injects fuel into the intake <br> cylinder port. |
| 20. What is CRDI stands for? | CRDI stands for common rail direct injection. |
| 21. How common rail direct <br> injection (CRDI) works? | CRDI directly inject fuel into the cylinders of a diesel engine through a <br> single common line known as the common rail. |
| 22. What is the difference |  |
| between CRDI and TDI |  |
| engine? |  |$\quad$| TDI is the turbo diesel engine while the CRDI is common rail direct |
| :--- |
| injection engine. |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400964 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Maintain Network System | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 50. Assessment Task 1: Select appropriate tools and equipment to check the operation of navigation system. <br> 51. Assessment Task 2: Select appropriate tools and equipment to perform maintenance of control area network (CAN) system. <br> 52. Assessment Task 3: Select appropriate tools and equipment to demonstrate the electric parking system. <br> And complete: <br> 53. Knowledge assessment test (Written or Oral) <br> 54. Portfolios at the time of assessment |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location of navigation device \& antenna <br> Performance Criteria 4: Perform removal and fitting of LCD from dashboard. <br> Performance Criteria 5: Check function of navigation card |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location of control area network (CAN) connector. <br> Performance Criteria 4: Remove and refit of control area network (CAN) connector. |

|  | Assessment Task 3 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Identify the location and function of ABS modulator <br> Performance Criteria 4: Identify the location and function of electric parking brake motors <br> Performance Criteria 5: Perform function of OBD - II scanner to release the electric parking brake motors |
| :---: | :---: |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio: Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Each Assessment Task (with performance criteria) |  |  |  |  |  |  |  |  |  |
| Assessment Task 1 |  |  |  | Description of assessment task 1 <br> Select appropriate tools and equipment to check the operation of navigation system. |  |  |  |  |  |
| During the practical assessment, candidate demonstrated the following: |  |  |  |  |  | Yes | No | Rem |  |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |  |  |  |  |
| 3 | Performance Criteria 3: Identified the location of navigation device \& antenna |  |  |  |  |  |  |  |  |
| 4 | Performance Criteria 4: Performed removal and fitting of LCD from dashboard. |  |  |  |  |  |  |  |  |
| 5 | Performance Criteria 5: Checked function of navigation card |  |  |  |  |  |  |  |  |
| Competent $\square$ |  |  | Not Yet Competent $\square$ |  |  |  |  |  |  |

| Assessment Task 2 |  | Description of Select approp maintenance | ssess <br> ate to | ent | k 2 <br> quipment to perform etwork (CAN) system. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |
| 3 | Performance Criteria 3: Identified the location of control area network (CAN) connector. |  |  |  |  |
| 4 | Performance Criteria 4: Removed and refit of control area network (CAN) connector. |  |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |

| Assessment Task 3 |  | Description of Select approp the electric pa | sses <br> iate to ing s | ment <br> s an <br> tem | k 3 <br> quipment to demonstrate |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |
| 3 | Performance Criteria 3: Identified the location and function of ABS modulator |  |  |  |  |
| 4 | Performance Criteria 4: Identified the location and function of electric parking brake motors |  |  |  |  |
| 5 | Performance Criteria 5: Performed function of OBD Il scanner to release the electric parking brake motors |  |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |

## WRITTEN ASSESSMENT

| Question | Candidate's answer |
| :---: | :--- |
| 35. Define navigation system? | Navigation system is a system that aids in navigation. |
| 36. Types of navigation system? | 15. Automotive navigation system <br> 16. Marine navigation system <br> 17. Satellite navigation system <br> 18. Surgical navigation system <br> 19. Inertial guidance system <br> 20. Robotic mapping |
| 37. What is the best navigation | Global positioning system (GPS) is the best navigation system. <br> system? |
| 38. Explain control area network |  |
| (CAN)? | Control area network (CAN) is a robust vehicle bus standard design to allow <br> microcontroller and devices to communicate with each other in application <br> without a host computer. |
| 39. Explain the application of |  |
| control area network (CAN)? | 9. Passenger vehicles <br> 10. Trucks <br> 11. Buses <br> 12. Gasoline vehicle <br> 13. Electrical vehicles <br> 14. Elevators <br> 15. Escalars <br> 16. Medical instruments \& equipments |
| 40. What is hill assist system? | Hill assist system control the car when you have stopped on an incline and <br> want to start moving again. |
| 41. What is ABS modulator? | ABS modulator is a device which electronically control ABS brakes from <br> brake locking up status. |

| Title of Qualification: <br> Automotive Mechatronics | CS Code: <br> 071400962 | Level: 4 | Version: |
| :--- | :--- | :--- | :--- |
| Competency Standard Title: <br> Service Comfort \& Safety System-II | Assessment Date (DD/MM/YY): |  |  |

| Candidate Details | Name: $\qquad$ <br> Registration/Roll Number: $\qquad$ |
| :---: | :---: |
| Guidance for Candidate | To meet this standard, you are required to complete the following within the given time frame (for practical demonstration \& assessment): <br> 55. Assessment Task 1: Select appropriate tools and equipment to perform operation and diagnose cruise control system by using OBD - II Scanner. <br> 56. Assessment Task 2: Select appropriate tools and equipment to demonstrate and diagnose supplementary Restraint System (SRS) by using OBD - II Scanner. <br> And complete: <br> 57. Knowledge assessment test (Written or Oral) <br> 58. Portfolios at the time of assessment (if any) |
| Minimum Evidence Required | During a practical assessment, under observation by an assessor, you will complete: <br> Assessment Task 1 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Understand and working principal of cruise control system. <br> Performance Criteria 4: Identify the faults in cruise control system with the help of OBD - II scanner |
|  | Assessment Task 2 <br> Performance Criteria 1: Apply relevant health and safety requirements during completion of task <br> Performance Criteria 2: Select tools and equipment for the given task <br> Performance Criteria 3: Install supplementary Restraint System (SRS) <br> Performance Criteria 4: Install seat belts assembly <br> Performance Criteria 5: Install Air bag module assembly |
|  | Portfolios required at the time of assessment (if any) for <br> Performance criteria 1 for the evaluation of portfolio : Submit note book or practical activity journal, completed during this specific module, for relevant activity with drawing/illustration |

Assessors Judgment Guide (to be completed by the Assessor and signed both by the assessor and the candidate after the assessment)

| Assessment Summary (to be filled by the assessor) |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Activity |  | Method |  |  |  |  | Result |  |  |
| Nature of Activity |  |  | $\overline{0}$ | $\begin{aligned} & \text { ᄃ } \\ & .0 \\ & 0 \\ & 0 \\ & 0 \\ & 00 \\ & 0 \\ & \hline \end{aligned}$ | 을 \# 0 |  |  | $\begin{aligned} & \stackrel{\rightharpoonup}{\overline{0}} \\ & \stackrel{\rightharpoonup}{0} \\ & \stackrel{0}{0} \\ & 0 \\ & \hline \end{aligned}$ |  |
| Practical Skill Demonstration |  |  |  | $\checkmark$ |  | $\checkmark$ |  |  |  |
| Knowledge Assessment |  | $\checkmark$ | $\checkmark$ |  |  |  |  |  |  |
| Other Requirement |  |  |  |  | $\checkmark$ |  |  |  |  |
| Each Assessment Task (with performance criteria) |  |  |  |  |  |  |  |  |  |
| Assessment Task 1 |  |  | Description of assessment task 1 <br> Select appropriate tools and equipment to perform operation and diagnose cruise control system by using OBD - II Scanner |  |  |  |  |  |  |
| During the practical assessment, candidate demonstrated the following: |  |  |  |  |  | Yes | No | Rem |  |
| 1 | Performance criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |  |  |  |  |
| 2 | Performance criteria 2: Selected tools and equipment for the given task |  |  |  |  |  |  |  |  |
| 3 | Performance criteria 3: Installed supplementary Restraint System (SRS) |  |  |  |  |  |  |  |  |
| 4 | Performance Criteria 4: Identified the faults in cruise control system with the help of OBD - Il scanner |  |  |  |  |  |  |  |  |
| Competent $\square$ |  |  | Not Yet Competent $\square$ |  |  |  |  |  |  |

|  | ment Task 2 | Description <br> Select approp and diagnose by using OBD | asse <br> iate upple - II Sc |  | ask 2 <br> equipment to demonstrate Restraint System (SRS) |
| :---: | :---: | :---: | :---: | :---: | :---: |
| During the practical assessment, candidate demonstrated the following: |  |  | Yes | No | Remarks |
| 1 | Performance Criteria 1: Applied relevant health and safety requirements during completion of task |  |  |  |  |
| 2 | Performance Criteria 2: Selected tools and equipment for the given task |  |  |  |  |
| 3 | Performance | belts assembly |  |  |  |
| 4 | Performance Criteria 4: Installed seat belts assembly |  |  |  |  |
| 5 | Performance Criteria 5: Installed Air bag module assembly |  |  |  |  |
| Competent $\square$ |  | Not Yet Competent $\square$ |  |  |  |
